

Continuation of Taxation Service Project

I. Project purpose

Continuation of Taxation Service Project is a sub-project affiliated with the 5th e-government program held by the NDC. Through the four services of "constructing e-accounting books service", "e-taxation documents verification service", "click-and-mortar real estate transfer service" and "two-way tariff and internal tax notification service", the Project provides better, integrated e-taxation service to profitable enterprises and individuals. Furthermore, it enhances the tax environment to achieve reduction of tax evasion and increase of taxation efficacy.

II. Implementation content

"Constructing e-accounting books service" provides profitable enterprises accounting books uploading service on the internet to reduce profitable enterprises' compliance cost. "E-taxation documents verification service" constructs an internet platform combined with myData service distributed by the NDC for individuals to apply for tax documents on the internet. "Click-and-mortar real estate transfer service" integrates land administrations and taxation bureaus to offer instructional inter-agency services to declare land value tax on the internet. "Two-way tariff and internal tax notification service" allows customs officers and tax officers to track tax-evading cases through the system.

III. Expected benefits

The Project is expected to promote more convenient, intelligent and effective taxation service of the digital government to achieve the goal set by the 5th e-government program.
